Know Best Time for Investment through Financial Astrology – financial debt in astrology

Earning money at the start of a career is not an easy task. However, once you start growing and earning a good amount, it becomes important to utilise the money efficiently. In this competitive era, managing money is also a major task. Some people are good at earning but they might be good at the investments. To get high returns from your money, it is essential to invest them wisely.

Investing in mutual funds, speculating in the stock market or buying a house are the common investment choices. However, these options involve a huge

amount of funds. Everyone wishes to get good returns from their investment. Therefore, it is essential to choose the right investment option and know the right time for investment.

Consulting an astrologer is an ideal solution before you make any investment. The astrologer would provide you the information about the position of the planets in your natal chart. If the ruling planets are in your favour, only then you can invest. However, investing in the wrong time can result in huge losses. With the help of financial astrology, you can know your strength and capability of taking a risk. You can invest a small amount to test if planets are in your support.

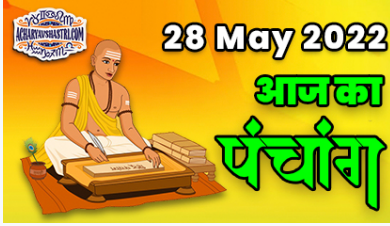

It is believed that when the planets Jupiter, Saturn, and Moon are in a good position, they tend to bring to benefits. That time is best for entering into the stock market. Moreover, that time is considered good for the purchase of a house or investment in real estate. Therefore, before you make any investment, get the analysis from an astrologer to know if you have raja yoga mahadasha or weak mahadasha.
